

Chicago Teen Birth Rate, 2010-2014

Source: Illinois Department of Public Health, Division of Vital Records

- Definition: Number of births per 1,000 females aged 15-19
- The majority of teen births are unintended and associated with outcomes such as low birth weight and infant mortality.
- From 2010-2014, the teen birth rate declined steadily in Chicago. However, Chicago's rate is higher than the national rate (24.2 in 2014).¹
- Racial/ethnic disparities exist in Chicago when it comes to teen birth rate. Non-Hispanic Black teens are over 6 times more likely to experience a birth than Non-Hispanic White teens.
- The community areas with the highest teen birth rates cluster in the west and south sides of the City.
- For more Chicago data, see the Chicago Health Atlas: <http://www.chicagohealthatlas.org/>
